

# TECHNARTE 2017

A unique opportunity to meet and network with artists and professionals creating and designing projects in the fields of interactive architecture and sculpture, human computer interaction, digital design, bioart, nanoart, robotics, gaming or immersive installations to name a few. Speakers include Paul-Felix Montez, Raven Kwok, Marpi, Hernán Ordiales, Borja de la Maza, Guvenc Ozel, among others.

In Technarte, our main objective is to disseminate the importance of the fusion between art, science and technology as a way to develop and advance each of fields. Additionally, we seek to promote new opportunities in the creative economy based around this union.

The Technarte International Conferences on Art and Technology have become a global reference for artists as well as professionals from the world of culture and technology.

Technarte has been held annually in Bilbao (Spain) for more than 10 years and this is the third edition of the International Conference in Los Angeles.

Technarte is a unique event for all those interested in the unification of Art, Science and Technology including artists, researchers, engineers, academics, technologists, cultural managers and anyone else who wants to be a part of the process. It is a space to share experiences and where new, innovative ideas and opportunities arise.

During the two-day annual conferences an immersive environment is created, both in terms of work and leisure, around all that connects Art, Science and Technology.
